

令和5年度（2023年度）大分大学グローバル感染症研究センター
研究集会報告書

採択番号	2023M01	
申請者に関する事項	氏名	Mohd Rohaizat Hassan
	所属機関名	National University of Malaysia
	職名	Professor
研究課題名	UKM-UMS-Oita University First Joint Eco Health Symposium on Human T lymphotropic virus Type 1 related diseases	
研究期間	令和6年（2024年）2月5日～令和6年（2024年）2月6日	
本センター担当教員	伊波 英克	

令和5年度（2023年度）研究集会の概要

The on-site and remote hybrid symposium titled "UKM-UMS-Oita University First Joint Eco Health Symposium on Human T lymphotropic virus Type 1 related diseases," coordinated by myself, Professor Mohd Rohaizat Hassan from the National University of Malaysia (UKM), saw a turnout of 468 participants and was a highly successful event. We also provided the opportunity for a site visit to the Medical Molecular Biology Institute (MMBI) at UKM, which houses maintenance for over a million blood samples, including 800 Orang Asli specimens.

On the second day, we guided them to the Orang Asli settlement, accompanied by the Health Management Center staff who oversee health and sanitation policies in the community. During our visit, we explored the settlement and received comprehensive explanations and local insights from officials regarding the operations of the health center outpost, primary and secondary schools, as well as the nutrition management center established within the settlement.

After the workshop

Orang Asli settlement visit
