Research Center for Global and Local Infectious Diseases, Oita University

FY2027 Open Call for Joint Research

In collaboration with domestic and international research institutes, RCGLID links a series of areas from basic research on pathogens and infectious diseases to clinical practice, including analysis of the pathophysiology of infections caused by microorganisms, genome analysis and microbiome research, which is one of the strengths of our university. By seamlessly collaborating, we aim to build an international and regional core research platform for infectious diseases. We are now inviting applications for joint research projects as outlined below. We sincerely look forward to receiving your enthusiastic application.

【Call for Proposals】

A) Priority Research

(Maximum application amount: 1,300,000 yen/proposal, FY 2026)

Research projects should address the Center's research themes described in these guidelines and be conducted in collaboration with the Center's faculty members. In particular, we invite proposals in the priority areas of gastrointestinal infectious diseases and gastric cancer prevention, including pathogen genomic epidemiology focusing on H. pylori, antimicrobial resistance (AMR), microbiome research, gastrointestinal endoscopy and endoscopic AI, and research utilizing international field collaborations, as well as One Health research.

B) General Research

(Maximum application amount: 700,000 yen/proposal, FY 2026)

Research projects related to the themes of this Center are to be conducted in collaboration with the Center's faculty members. In particular, projects within internationally and academically significant research fields that the Center strategically pursues will receive prioritized support.

C) Research Seeds

(Maximum application amount: 300,000 yen/proposal, FY 2026)

To broaden the scope of infectious disease research, promote collaborative studies, and expand research networks, projects will be conducted in coordination with the Center's faculty members based on novel research ideas.
